

Network Message Design Document

Project: Battleship Game

This document will outline all network messages sent between players and the system during gameplay.

Chat Message

Purpose: allows players to communicate with each other

Sender: Player

Receiver: other player

Format: sender, message

Examples:

- Player1: hi
- Player2: awww shucks

System Messages

Purpose: sent by the system to inform the player of the current status of the game

Sender: system

Receiver: host, player

Format: SYSTEM, message

Examples:

- (host): SYSTEM: Waiting for client to join...
- SYSTEM: Battle Started! Good luck.

Connection messages

Purpose: confirms when a player successfully connects to the game server

Sender: System/server

Receivers: player(s)

Format: connection status

Example:

- Connection Successful
- Client connected. Starting game...

Launched missile

Purpose: sent when a player launches a missile at a coordinate on the opponent's board and informs the player if the missile hits or misses

Sender: System

Receiver: player

Format: System, player, coordinate, hit/miss

Example:

- System: Player2, A1, miss
- System: player1, F10, hit
